

SIERA HF Net Control Script

Revised: January 8, 2021

Good evening. This is (Name and Callsign), **Net Control for this Tuesday evening SIERA HF net. This net is sponsored by the Sierra Intermountain Emergency Radio Association, in the Carson Valley of northern Nevada. Our net meets at 8:00 PM every Tuesday evening on or near the frequency of 3982 kHz. Please tune to this station. While sponsored by SIERA, this net is open to all amateurs who are interested in HF communication, regardless of club affiliation and location. It will be an opportunity to test their equipment and learn customary net protocol. Your participation is welcome.**

This is a directed net and all stations not involved in the net are asked to please stand by until the net is clear, which will be in less than 15 minutes. Proxy or early check-ins cannot be accepted, except for members who are present in the household.

This is (Name and Callsign). **Is there any emergency or priority traffic? Call net control now. Any relays?**

Are there any "all station" messages, or contacts requested for after the net?

(“all station” messages are handled in the order of their listing.)

(Ask listing stations to repeat their messages after roll call.)

(Contact requests are handled after the close of the net.)

Please stand by for roll call, which we will start now.

[Do the roll call]

That is the roll call as I have it. Are there any late or missed stations?

Are there any guests who wish to check in and be added to our roll?

(Repeat any “all station” messages)

[Closure]

Is there any further business for this net?

With no further business, we close the net at (time) **local time.**

Thanks to all stations for your participation and I hope to see you next week!

This frequency is now returned to regular amateur use. (Name and Callsign,) **Clear.**

(Turn the frequency over to the first listed informal or other traffic station, if any).
